

## Abalone Assist Container Group

### Step 1 Create a Container Group

The Container Group Screen is used to correlate Container Ids in different sections of the farms for example Hatchery, Larvae, Nursery, Growout are all examples of how you can break the farm into different parts. Each Container Group may also be in different site locations and you have the option of selecting a Site Name and Company Name record by clicking on the ? mark button next to Company Name.

Container Group Name

Company Name  ?  
Site Name   
Report Name (None) ▼  
Comment  >>

Surface Area (cm2)

Stocking Density

Max Weight (kg)   
Tank Layout Style (None) ▼  
Orientation On Site (None) ▼

Order No in Site

**Tanks:**

Container Id	Report Name	Container Size (m)	Year Built	Comment

< ||| >

(0)

**Detailed Stocking Densitys:**

Fish Species	Size Class (mm)	Max Weight (kg)
