

Hatchery Assist Creating Incubators, Troughs, Banks

Step 1 Bank Screen

The Bank Screen represents a storage location of where you keep your incubators and can also be climate controlled ie Heat, Chill and Ambient

The screenshot shows a software window titled "Bank". It contains several input fields: "Company Name" with a help icon, "Site Name", "Bank Id", and "Bank Type" set to "(None)". Below these is a section labeled "Bank Lays:" containing a table with four columns: "Incubator Id", "Lay Date", "Date Mov...", and "Person Responsible". The table is currently empty. To the right of the table are buttons for "Add", "Edit", and "Delete", with a "(0)" indicator below them. At the bottom of the window are navigation buttons: "Save", "Find", "Delete", "Reset", "Print", "Refresh", "Cancel", "Help", and "Import".

Incubator Id	Lay Date	Date Mov...	Person Responsible

Step 2 Incubator Screen

This screen records the individual vessel for egg storage.

Incubator

Incubator Id

Incubator Size

Incubator Type

Lay Downs:

Lay Date	No Degree Days	Incubator Days left	Degrees Days left	Water Temp

(0)

Step 3 Trough Screen

Troughs are like tanks but are used in the incubation stage to hold hatched out eggs.

Trough

Trough Id

Trough Type

Incubator Troughs:

Female Fish Id	Stripping Date	From Incubator Id	Moved D...	Moved Ti...	N

(0)
