Tank Group

This field identifies the tank group for example Nursery, Growout, Quarantine etc.

Tank Layout Style

This field tells the Site Layout Report the orientation of the tank group and the order of the tanks within the tank group

Order No in Site

This field tells the Site Layout Report in what order is the tank group is to be displayed the field only accepts a integer number.

Orientation On Site

This field tells the Site Layout Report the orientation of the group of tanks ie Vertical or Horizontal

Feed Method

This field is used by the Feeding Data Wizard and some of the different choices affect the fields that the Feeding Data Wizard displays for example None means that this Tank Group will not be displayed for entering in feed data. Hand Only will only display qty fields based on hand feeding methods, while Auto Feed will be based on Automatic Feed Qtys.
